**GRUMBACHER®
Acrylic Gel Medium**

Colorless acrylic medium. When mixed with acrylic colors, it increases transparency while maintaining hue, consistency, and brushing characteristics. Dries clear, retaining textures made by brush or knife. 150ml/5 oz.

No. GB531
SRP \$21.45 ea

**S12**
**GRUMBACHER®
Modeling Pastes**

For texture effects. Ready-to-use paste with excellent adhesive qualities. Shape and texture when wet. Cut, carve, and sand when dry. Makes acrylic colors more viscous, translucent, matte, and slower drying.

No.	Description	SRP

LIQUITEX® **\$10** Professional Series Heavy Body Acrylic Paints

Thick consistency for traditional art techniques using brushes or knives, as well as for experimental, mixed media, collage, and printmaking applications. Impasto applications retain crisp brush stroke and knife marks. Good surface drag provides excellent handling and blending characteristics with increased open-working time. High pigment load produces rich, brilliant, permanent color.

S10 LIQUITEX® Gloss Heavy Gel Mediums

Extra heavy body medium. Dries to a transparent or translucent gloss finish. Mix with acrylic paint to increase body, density, viscosity, and to attain oil paint like consistency with brush or palette knife marks. Extends paint while increasing brilliance and transparency. Keeps paint workable longer than other gel mediums.

No.	Description	SRP
5120	8 oz.	\$16.30 ea
5121	16 oz.	26.50 ea
5123	1 gallon	119.99 ea

S10 LIQUITEX® Slow-Dri® Blending Gel Mediums

A unique, heavy body formulation for superior surface blending with acrylic paints. Extends drying time up to 40% for superior surface blending with acrylic paints. Mix any amount into color to enhance the depth of color intensity, increase transparency, gloss, and add flexibility and adhesion to paint film. Dries clear to reveal full, rich color. Unlike retarding additives, any quantity may be added to color without jeopardizing the strength of the paint film. Translucent when wet, transparent when dry. Flexible, non-yellowing and water resistant when dry.

No.	Description	SRP
7208	8 oz.	\$16.30 ea
7216	16 oz.	26.50 ea

S10 LIQUITEX® Matte Gel Mediums

Dries translucent with a satin/matte finish. Viscosity and body similar to heavy body acrylic color. Great adhesion. Translucent when wet, transparent when dry. Thicker applications result in less transparent dry medium films. Mix with heavy body acrylic colors to obtain paint similar in color depth to oil paint. Color mix will dry to a satin sheen.

No.	Description	SRP
5321	8 oz.	\$16.30 ea
5322	16 oz.	26.50 ea

S10 LIQUITEX® Matte Super Heavy Gel Mediums

Extremely thick, extra heavy bodied, very dense, with high surface drag for a stiff oil-like feel. Dries to a translucent matte finish depending on thickness of the application. Very little shrinkage during drying time. Excellent adhesion for collage and mixed media. Extends and keeps paint working longer than other gel mediums. Flexible, non-yellowing and water resistant when dry.

No.	Description	SRP
5808	8 oz.	\$16.30 ea
5816	16 oz.	26.50 ea

S10 LIQUITEX® Gloss Gel Mediums

Dries to a gloss finish. Viscosity and body similar to heavy body colors. Dries clear to translucent depending on thickness of application. Ideal medium to mix with heavy body acrylic color to extend paint, increase the brilliance and transparency of color, without changing the thickness of the paint or mix to obtain paint similar in color depth to oil paint.

5732	32 oz.	38.99 ea
5736	1 gallon	99.99 ea

S10 LIQUITEX® Gloss Medium & Varnish

All-purpose medium formulated to be mixed into acrylic paints and mediums. Mix into any acrylic paint to enhance the depth of color intensity, increase transparency, gloss, ease flow of paint and add flexibility and adhesion of paint film. Use as a non-removable varnish to protect painting and establish gloss sheen surface. Translucent when wet, transparent when dry. Dries to a non-tacky, hard, flexible surface that is resistant to dirt retention. Depending upon substrate, allows moisture to pass through (breathable). Will not crack as surface expands and contracts during temperature and humidity changes. Not for use over oil paint.

7416	16 oz.	26.50 ea
7432	32 oz.	38.99 ea

S10 LIQUITEX® Ultra Matte Gel Mediums

A translucent white gel of high density and high solids that economically extends the volume of acrylic color without changing its heavy body. Add up to 50% by volume to double amount of paint and retain color position. If more than 50% is added, it acts as a very weak tinting white. Maintains the opacity of the color better than using a clear gel medium. Dries to a matte finish, giving colors a matte sheen and gouache look.

No.	Description	SRP
5420	8 oz.	\$16.30 ea
5426	16 oz.	26.50 ea

S10 LIQUITEX® Ultra Matte Mediums

Increases the volume of paint while maintaining the opacity of the color it is mixed into. Opacity of colors mixed with this medium will be higher than if the color had been thinned to the same degree with any other medium except Modeling Paste. The degree to which the color can be extended will vary among the different pigments. When over 50% is added, this medium can act as a weak tinting white, increasing the value of the original color approximately one level. Light colors will be affected less than dark colors. Colors dry to a matte finish.

No.	Description	SRP

5436	1 gallon	99.99 ea

\$10**LIQUITEX®
Flow Aid Additive**

Use in conjunction with any acrylic color or medium when increased flow and absorption and decreased film tension and friction are important. A flow enhancer that improves the flow, absorption, and blending of any water-soluble paint (i.e. acrylic), medium, ink or dye. Minimizes brush marks by reducing friction of paint application. Does not contain binder. Over thinning of acrylic paint and applying to a non-absorbent surface (i.e. gessoed canvas) may result in poor adhesion. Always make a test piece for your particular application and surface. On non-absorbent surfaces, will increase the fluidity and open drying time of the paint. On absorbent surfaces, will act as a stain, dye or watercolor. 4 oz.

No. 5620

SRP \$10.99 ea

6308

\$10**LIQUITEX®
Slow-Dri®
Blending Mediums**

A unique formulation that extends drying time up to 40% for blending with acrylics. Adds flow to acrylic color with soft body. Mix any amount into color to enhance the depth of color intensity, increase transparency, gloss, ease flow of paint, and add flexibility and adhesion to paint film. Dries clear to reveal full, rich color. Unlike retarding additives, any quantity may be added to color without jeopardizing the strength of the paint film. Translucent when wet, transparent when dry. Flexible, non-yellowing and water resistant when dry.

L6008

L6125

\$10**LIQUITEX®
Soluvar® Archival
Removable Varnishes**

Low viscosity, very fluid. Apply as a final varnish over dry acrylic or dry oil paint. Increases the depth and intensity of color. Permanent, removable, final varnish for acrylic and oil paintings that protects painting surface and allows for removal of surface dirt, without damaging painting underneath. Once surface is clean, a new coat of Soluvar may be reapplied to surface. Thin with mineral spirits or turpentine but do not use odorless mineral spirits. Dries to a clear, non-tacky, water resistant, hard film that is resistant to retention of dirt and prevents dirt and pollutants from contacting paint surface. Self-leveling, will not hold brush strokes. Flexible, will not crack as surface expands and contracts during temperature and humidity changes. Resists discoloring due to humidity, heat and ultraviolet light. Protects painting against harsh elements. For interior and exterior use.

LIQUITEX® S10 Modeling Paste Mediums

Extra heavy body and very opaque. A marble paste made of marble dust and 100% polymer emulsion. Used to build heavy textures on rigid supports and create three-dimensional forms. Dries to the hardness of stone. It can be sanded or carved when thoroughly dry. Can be handled like clay if the top of the container is removed and some of the water is allowed to slowly evaporate until it reaches a clay-like consistency. Adheres to any non-oily, absorbent surface. Drying too quickly causes mud cracking that is usually cosmetic, not structural. When mixed with acrylic colors will act as a weak tinting white, while increasing thickness and rigidity. Excellent substrate for acrylic paint, oil paint, oil pastel, oil bars, watercolor, graphite, or dry pastel.

S10 LIQUITEX® Fabric Medium

Enhances the workability of acrylic paint on fabric. Controls bleeding of colors thinned with water. Provides a smooth, consistent flow when added to soft body acrylic colors. Prevents uneven application of paint to rough textured fabrics. Reduces stiffness of dried acrylic paint on fabric. Eliminates the need to scrub or abrade rough textured fabrics to enable paint to adhere or penetrate surface. Does not require heat setting. 4 oz.

No. 126804
SRP \$10.99 ea

LIQUITEX® S10 Slow-Dri® Retarder Additives

Fluid consistency that thins all acrylic paint and mediums. Increases open working time of acrylic paint. Reduces paint skinning-over on palette. Increases blending time, making blending of colors and detail brushwork easier. Mix with acrylic paints and mediums to retard drying time up to 50%. Fluid consistency, made to be used with soft body colors and mediums. May also be used with heavy body colors and gel mediums, however thickness of paints and mediums will be reduced to a more fluid consistency. Archival. Gel retarder is similar to fluid retarder, except in heavy body gel consistency. Designed to be used with heavy body colors mediums. May also be used with soft body colors and mediums, however thickness of acrylic paints or mediums will be increased. Increases blending time.
